Business Strategy

Course Introduction

Business strategies are critical to the success of every company, whichever industry it is in. However, developing an effective business strategy is easier said than done.

Harvard Business Review, in its research, indicated that 85 percent of executive leadership teams spend less than one hour per month discussing strategy, and half spend no time at all. The research also reveals that most employees don't understand their company's strategy. No wonder that 90 percent of businesses fail to meet their strategic targets. Organizational leaders must ensure the company's goals are strong and that the plan to reach them is purposeful, executable, and agile.

This training course is designed to provide participants with the essential and key concepts and strategies in order to develop and implement an effective business strategy. This training course will equip participants with the tools, frameworks, and knowledge to set goals, advocate for the benefits of strategic planning, formulate a winning strategy, and improve their strategic skill set.

Business Strategy

Target Audience

This training course is designed and beneficial for leaders, managers, and professionals involved in the planning, management, and implementation of business strategies.
