## Microsoft 365 Mobility and Security

### Course Introduction

This training course is designed to provide participants with the three central elements of Microsoft 365 enterprise administration – **Microsoft 365** security management, Microsoft 365 compliance management, and Microsoft 365 device management.

This course covers topics such as the common types of threat vectors and data breaches, how Microsoft 365's security solutions address these security threats, and how to manage the Microsoft 365 security services, including Exchange Online Protection, Advanced Threat Protection, Safe Attachments, and Safe Links. This course will allow participants to transition from security services to threat intelligence, specifically, using the Security Dashboard and Advanced Threat Analytics to stay ahead of potential security breaches.
