## Critical Thinking and Decision Making

### Course Introduction

In today's evolving and highly competitive business environment, the impact and risks of decisions are greater than ever. Business leaders must be critical thinkers and make decisions about the company's strategic direction, competitive positioning, and proper allocation of resources. In most cases, leaders cannot rely on what has worked in the past, as the business challenges are ever-changing. Therefore, they have to be able to adequately assess options, potential consequences, and promptly adjust to new information in order to ensure they consistently make the right decisions.

This training course is designed to provide delegates with the relevant concepts and tools in order to apply the techniques of critical thinking and become logical decision makers. This course will allow them to learn the structured way to approach, resolve problems, and clarify issues with a view toward optimum outcomes.
