Blockchain Technologies: Business Innovation and Application

Course Introduction

Blockchain is a game-changing technology that is driving exponential growth in business processes to keep pace with the speed of business, transparency, traceability, and reduced costs. All companies will need to start preparing for the greatest technology innovation since the creation of the World Wide Web. They need a blockchain strategy that will keep them competitive as they lower costs and increase efficiencies.

This course is designed to provide participants with the essential concepts behind blockchain technology, how it is changing the business field, and the latest applications and innovations present in industries. In addition, it seeks to provide participants with insights on how to best leverage and exploit blockchain for business projects, organizations, or start-ups.

Blockchain Technologies: Business Innovation and Application

Learning Objectives

- ✓ Explore and gain an in-depth understanding of the concept of blockchain technology through an economic perspective
- ✓ Identify the possibilities and limitations of blockchain technology, and evaluate its long-term implications for your business
- ✓ Recognize the two key costs significantly lowered by blockchain technology: the cost of verification and the cost of networking
- ✓ Develop a blockchain-based solution to address the current business problem.

Blockchain Technologies: Business Innovation and Application

Course Outline

✓ Day 01

Module 1: An Introduction To Blockchain Technology

- ✓ Learn how to think about problems that may require a blockchain by dispelling some common misconceptions about the technology and comparing it to other general-purpose technologies.

Module 2: Bitcoin And The Curse Of The Double-Spending Problem

- ✓ Evaluate Bitcoin as a specific application of blockchain technology that solves a meaningful problem.
- ✓ Analyze this cryptocurrency as a store of value, medium of exchange, and unit of account.

Blockchain Technologies: Business Innovation and Application

Course Outline

✓ Day 02

Module 3: Costless Verification: Blockchain Technology And The Last Mile Problem

- ✓ Discover how blockchain technology lowers the cost of verification.
- ✓ Consider how blockchain and suitable complementary technology can be used to solve the last-mile problem.

ABU DHABI: +971 2 449 6000

ABU DHABI: +971 50 412 3294
