Strategies of Contract planning, negotiations and dispute resolutions

Course Introduction

The course will help delegates to develop their ability to negotiate contracts effectively. It will equip them with a range of interpersonal skills and an appreciation of the elements of planning and objective setting in negotiations. There will be an opportunity for delegates to carry out a self-assessment of their skills in key areas of negotiation, including team negotiations.

Every day, significant money is made and lost by organizations as a result of the contractual terms and conditions governing contracts for the purchase of goods, equipment, and services. Since all business activities are governed by contractual relationships, it is increasingly important for all those dealing with outside organizations to have an understanding of how to obtain the best possible agreement for their organization.
