Effective HR Metrics and Analytics

Course Introduction

Companies and organizations must make decisions based on a variety of factors and perspectives, and few are as important as human resources when it comes to taking action. A company's human capital is vitally important, but it is one of the more complex sides of operating a business.

Instead of clean, hard data, employees can present a variety of qualitative factors that are hard to put into numbers that work for analytics.

This training course is designed to provide participants with an in-depth introduction to HR analytics that will enable them to develop the skills to initiate a HR analytics systematic plan in utilizing methods and tools in linking HR and business strategies, assessing organisational readiness for analytics initiatives, building the credibility and value added by HR using analytical insights to improve talent management processes defining the roles, capabilities, and structures required to maximise analytics effectiveness.

Effective HR Metrics and Analytics

Target Audience

- ✓ Business Owners and Managers
- ✓ HR Administrators
- ✓ HR Business Partners
- ✓ HR Professionals tasked with providing HR data to support strategy development and delivery
