Corporate Finance and Credit Program

Course Introduction

The Corporate Finance and Credit Program training is designed to equip professionals with the essential knowledge and skills required to navigate the complexities of corporate finance and credit management effectively. Over the course of five days, participants will delve into foundational concepts such as financial statement analysis, capital budgeting, and cost of capital, gaining a solid understanding of the principles that underpin financial decision-making. Through interactive sessions and practical exercises, participants will learn how to evaluate investment opportunities, optimize capital structure, and manage working capital efficiently to enhance organizational value and profitability.

Financial planning

Furthermore, the course will explore advanced topics in financial planning, forecasting, and credit management, providing participants with insights into credit analysis, credit scoring models, and risk assessment techniques. By the end of the training, participants will be equipped with the knowledge and tools to develop and implement robust financial strategies and credit programs that align with organizational objectives and drive sustainable growth.
