## Certificate in Design Thinking

### Course Introduction

In today's dynamic and complex world, innovation is no longer a luxury — it's a necessity. Organizations that thrive are those that deeply understand human needs, think creatively, and move rapidly from ideas to solutions.

Design Thinking is the globally recognized, human-centered approach that empowers individuals and teams to tackle real-world challenges creatively and systematically.

The Certificate in Design Thinking by **BOOST** is a comprehensive, hands-on learning journey that equips professionals with the tools, mindsets, and frameworks necessary to drive meaningful innovation.

This intensive program blends theory with application through immersive exercises, live case studies, and group design sprints, allowing participants to experience the full design thinking cycle from empathy to prototyping and testing.

By the end of the course, participants will be confident applying design thinking to create better products, services, processes, strategies, and experiences — leading to measurable impact for their organizations.
