Security Management: Safety and Protection of Corporate Facilities

Course Introduction

The security of governmental buildings and facilities

The security of governmental buildings and facilities affects not only the daily operations of the government but also the health, well-being, and safety of employees and the public. This also applies to important facilities operated by private companies or non-profit organizations. There is a need for building protection by investigating, detecting, deterring and disrupting security threats. In order to protect and safeguard effectively and efficiently, personnel need to be trained in communication skills, infrastructural know-how and methodologies for the coordination of relevant parties. This course is designed to provide necessary skills and instill participants with examples of best practices and the familiarity to implement them individually. This detailed and interactive course is designed to give a thorough understanding of how to manage security within an organisation. It is designed for both experienced and non-experienced security managers. The course focuses on developments in security management and addresses some of the more complex issues of corporate security management.
