Certified Lean Six Sigma for Project Managers

Course Introduction

This **Certified Lean Six Sigma for Project Managers** program from **BOOST** provides project managers with essential tools and techniques for applying Lean Six Sigma methodologies to improve project efficiency, reduce waste, and deliver high-quality results. Participants will learn how to use the **DMAIC** framework (Define, Measure, Analyze, Improve, Control) and Lean principles to optimize project processes, enhance stakeholder satisfaction, and drive continuous improvement in their projects.

This course includes hands-on practice, case studies, and tools that are directly applicable to real-world project management scenarios. At the end of the program, participants will be equipped to lead projects using Lean Six Sigma principles, ensuring the successful delivery of projects within scope, time, and budget constraints.
