Emergency Preparedness and Crisis Management for Industrial Security Officers

Course Introduction

This program from **BOOST** is designed to equip industrial security officers in the Oil & Gas sector with the expertise to plan for, respond to, and recover from emergencies and crises. Given the sector's exposure to incidents such as fires, explosions, hazardous material leaks, natural disasters, and hostile actions, security officers play a critical role in minimizing risks and protecting people, assets, and the environment. The course blends theory with practical exercises to ensure participants can handle emergencies under pressure, coordinate effectively with HSE teams and external agencies, and support business continuity.
