Fundamentals of Industrial Security for Oil & Gas Operations

Course Introduction

This foundational program from **BOOST** provides newly appointed industrial security officers with essential knowledge and skills to safeguard oil and gas facilities. The course introduces participants to the principles of physical security, asset protection, access control, surveillance systems, and emergency response. With a focus on upstream, midstream, and downstream operations, participants will learn how to identify threats, apply preventive measures, and enforce security policies effectively within high-risk industrial environments.
