## The Glow of Magic: Mastering Emotional Intelligence Techniques

### Course Introduction

Recent studies indicate that 25% of leaders' success derives from raw intelligence, while 75% of their success stems from their ability to understand the needs of their company and build relationships with members of their organization.

This program links emotional intelligence to practical behaviours for daily life situations as well as for business situations in your workplace. In this workshop, participants assess the strengths and areas of improvement in their emotional intelligence capabilities and identify ways they can increase their emotional intelligence when dealing with others.

The workshop starts with a series of guided reflections and takes participants through a series of emotionally charged situations through which they develop a greater understanding of EQ, and will be equipped with practical tools and techniques to interpret this understanding into behaviours in real life.
