Advanced Certificate in Sustainable Real Estate Development

Course Introduction

The **Advanced Certificate in Sustainable Real Estate Development** course from **BOOST** is designed to provide real estate developers, architects, and project managers with the knowledge and skills to integrate sustainability into the design, development, and management of real estate projects. The course covers advanced concepts in sustainable development, including energy-efficient design, sustainable construction methods, green building certifications (e.g., LEED, BREEAM), and the financial and regulatory aspects of sustainable real estate.

Participants will gain a practical understanding of how to create long-term value in real estate developments while minimizing environmental impact and enhancing social and economic outcomes.
