Digital Procurement Technologies and Automation

Course Introduction

This training is designed by **Boost** to equip procurement and supply chain professionals with the knowledge and tools to embrace digital technologies and automation across procurement functions. As organizations face increasing complexity and demand for efficiency, digital procurement enables smarter sourcing, improved compliance, faster processes, and data-driven decision-making. Automation not only streamlines routine tasks but also enhances supplier collaboration and transparency across the value chain.

Participants will gain practical insights into digital procurement platforms, automation tools, and emerging technologies such as AI, blockchain, and robotic process automation (RPA). The course emphasizes both technical understanding and strategic application, ensuring participants are prepared to lead digital transformation initiatives in procurement and deliver measurable business value.
