Supply Chain Risk Management (SCRM)

Course Introduction

In an increasingly interconnected global economy, organisations must effectively manage uncertainties that threaten supply chain operations. Supply Chain Risk Management (SCRM) has become a critical strategy for companies aiming to maintain operational continuity, supplier reliability, and business resilience in the face of disruptions such as geopolitical instability, cyber threats, natural disasters, and market volatility.

This corporate training program on Supply Chain Risk Management (SCRM) equips professionals with the tools and frameworks required to identify, assess, and mitigate risks across the entire supply chain network. Participants will learn how to analyze potential vulnerabilities, evaluate supplier risks, and implement proactive risk mitigation strategies that protect business operations.

The course focuses on practical approaches to risk identification, supply chain visibility, contingency planning, and resilience building, helping organisations strengthen their ability to respond quickly to disruptions. By integrating risk assessment methodologies, supply chain analytics, and strategic sourcing practices, companies can minimize operational disruptions and ensure consistent delivery of products and services.

Through this program, supply chain professionals and managers gain the knowledge to design secure, agile, and resilient supply chain systems, enabling organisations to improve decision-making, enhance supplier collaboration, and maintain competitive advantage in dynamic global markets

Supply Chain Risk Management (SCRM)

Learning Objectives

- ✓ Identify and assess risks across the end-to-end supply chain
- ✓ Apply frameworks for supply chain risk mapping and prioritization
- ✓ Develop risk mitigation strategies including redundancy and diversification
- ✓ Implement resilience frameworks for disruption preparedness and recovery
- ✓ Leverage digital tools for real-time monitoring and predictive risk analytics

Supply Chain Risk Management (SCRM)

Course Outline

✓ Day 01

Understanding Supply Chain Risk

- ✓ Defining Supply Chain Risks
- ✓ Categories: operational, financial, geopolitical, environmental, cyber
- ✓ Common risk triggers in global supply chains
- ✓ Case studies of recent disruptions

Frameworks for Risk Assessment

- ✓ Risk identification tools and techniques
- ✓ Probability vs. impact analysis
- ✓ Supply chain risk mapping and visualization

ABU DHABI: +971 2 449 6000

ABU DHABI: +971 50 412 3294

Supply Chain Risk Management (SCRM)

Course Outline

✓ Day 02

Risk Mitigation Strategies

- ✓ Preventive Risk Management
- ✓ Supplier diversification and multi-sourcing
- ✓ Inventory buffers and safety stock strategies
- ✓ Financial hedging and insurance

Collaborative Risk Management

- ✓ Engaging suppliers in risk-sharing strategies
- ✓ Contractual risk allocation models
- ✓ Joint risk management initiatives across the value chain

ABU DHABI: +971 2 449 6000

ABU DHABI: +971 50 412 3294

Supply Chain Risk Management (SCRM)

Course Outline

✓ Day 03

Building Resilient Supply Chains

- ✓ Principles of Supply Chain Resilience
- ✓ Flexibility, redundancy, and agility in design
- ✓ Resilience frameworks and global best practices
- ✓ Examples of resilient supply chains under stress

Operationalizing Resilience

- ✓ Building redundancy in logistics networks
- ✓ Dual sourcing for critical materials
- ✓ Role of digital twins in resilience planning

ABU DHABI: +971 2 449 6000

ABU DHABI: +971 50 412 3294

Supply Chain Risk Management (SCRM)

Course Outline

✓ Day 04

Digital Tools and Predictive Analytics

- ✓ Technology for Risk Management
- ✓ IoT and real-time supply chain visibility
- ✓ Blockchain for transparency and traceability
- ✓ AI for predictive disruption analysis

Data-Driven Risk Monitoring

- ✓ Risk dashboards and early warning indicators
- ✓ Integration of ERP and risk management tools
- ✓ Using big data for supply chain resilience

ABU DHABI: +971 2 449 6000

ABU DHABI: +971 50 412 3294
