Data Management - Mid to Advanced

Course Introduction

As organizations mature digitally, data management evolves from operational control to a strategic governance capability. At advanced levels, the challenge is not fixing isolated data issues, but designing sustainable structures that ensure data consistency, accountability, scalability, and compliance across the enterprise.

Developed by **Boost**, this course addresses data management from a strategic and organizational perspective. The program equips participants with advanced approaches to designing data ownership models, governance frameworks, operating structures, and decision mechanisms that support long-term business objectives.

Boost's Data Management - Mid to Advanced course enables organizations to institutionalize data discipline and build resilient, scalable data foundations.
