Consulting and Training | Reach New Heights

Risk Management in Healthcare

Course Introduction

Risk Management in Healthcare

This training program is designed to help professionals develop the skills and knowledge required to address complex and challenging risks and uncertainties that arise in the healthcare field. Participants will develop their healthcare risk identification, analysis, and control skills in an integrated manner to help your organization achieve the required protection in all healthcare processes.

Training Program Methodology

This training program is implemented by combining the participants' academic knowledge and practical practice **(30% theoretical / 70% practical activities).** This program focuses on exercises, case studies, individual and group presentations, and Role-playing, among other advanced training techniques. At the end of the training program, Participants will be involved in a practical workshop to show their skills in applying what they were trained for.

A detailed report is submitted to each participant and the training department in your organization on the results of the participant's performance and the return on training.
