Corporate Governance: Principles, Policies and Best Practices

Course Introduction

Corporate governance is a cornerstone of organizational integrity, accountability, and long-term sustainability. As regulatory expectations, stakeholder scrutiny, and business complexity continue to increase, organizations are required to adopt sound governance principles supported by clear policies and effective practices.

The Corporate Governance: Principles, Policies and Best Practices course is designed for professionals who are involved in governance, oversight, or policy-related roles and seek to deepen their understanding of how governance frameworks operate in practice. Within BOOST, this program focuses on bridging governance theory with practical application, enabling participants to understand not only what good governance looks like, but how it is implemented and sustained.

The course explores the fundamental principles of corporate governance, the development and implementation of governance policies, and the application of recognized best practices across boards, management, and organizational structures. Participants gain insight into roles and responsibilities, ethical leadership, risk oversight, transparency, and compliance.

By combining governance concepts with real-world organizational contexts, this program equips participants with the knowledge and practical perspective needed to support strong governance systems, enhance decision-making, and promote trust among stakeholders.
