Contract Management Principles and Practices

Course Introduction

Faced with increasing challenges to reduce costs and improve financial and operational performance, companies can benefit from effective contract management to get the best from every project. Business heads, project managers, contract managers, and other professionals involved in the development of contracts must have an understanding of what the binding document actually states and a willingness, by the contractual parties, to cooperate in achieving the desired goal.

This **5-day Boost** training course is designed to provide participants with the fundamental foundations and practices in managing contracts effectively – whether in the field of construction, the supply of equipment and materials, or in the delivery of services.
