API Design and Fundamentals of Google Cloud's Apigee API Platform

Course Introduction

Throughout this course, you will gain proficiency in API design and documentation using OpenAPI specifications. Delve into the API life cycle and discover how the Apigee API platform facilitates comprehensive management of all stages of this cycle. Explore the utilization of API proxies for API design and the process of bundling APIs into consumable API products for application developers.

Through a blend of lectures, practical labs, and supplementary resources, you will master the skills necessary to effectively conceptualize, construct, safeguard, deploy, and oversee API solutions leveraging Google Cloud's Apigee API Platform.

This course marks the initial step in the Developing APIs with Google Cloud's Apigee API Platform series, laying the foundation for further exploration in the API Security on Google Cloud's Apigee API Platform course upon completion.

This course is designed to be interactive and participatory, and includes various learning tools to enable the participants to function effectively and efficiently. The course will use sessions, exercises, and case applications, and presentation about proven-by-practice methods, new insights and ideas about emotional intelligence and its effects in a corporate world.

API Design and Fundamentals of Google Cloud's Apigee API Platform

Learning Objectives

- ✓ Gain a comprehensive understanding of the Apigee platform, exploring its core features and functionalities essential for effective API management.
- ✓ Explore the fundamental concepts of API management and delve into the intricacies of the API life cycle, from inception to deployment and beyond.
- ✓ Learn the principles of API-First development and delve into the intricacies of OpenAPI specifications, laying the groundwork for structured and standardized API design.
- ✓ Master the utilization of API proxies within the Apigee platform, including configuring proxy and target endpoints, managing environment groups, and defining route rules.
- ✓ Acquire proficiency in designing and packaging APIs into consumable API products tailored for application developers, along with strategies for effective API product management and deployment to enhance developer experience and API security.
