Data Governance Fundamentals: Building Awareness & Foundations

Course Introduction

This **BOOST** foundational program is designed to introduce participants to the core principles of Data Governance in a clear, structured, and non-technical manner. The course focuses on building awareness of why Data Governance is essential for modern organizations and how it supports decision-making, compliance, data quality, and accountability.

Participants will gain a practical understanding of governance concepts, roles, policies, and operating models without deep technical complexity. The program emphasizes clarity, organizational alignment, and readiness, making it ideal for organizations that are at an early stage of their Data Governance journey or looking to establish a common language and baseline understanding across teams
