Applied Data Governance for Business & Operations

Course Introduction

This **BOOST** program focus on how Data Governance is practically applied within business operations. It emphasizes how governance supports operational efficiency, data quality, reporting accuracy, and regulatory compliance.

Participants will explore governance concepts through real-life business scenarios and learn how to translate governance principles into operational processes, controls, and responsibilities. The program is ideal for organizations that already recognize the importance of Data Governance and want to operationalize it across departments.
