Strategic Planning and Execution

Course Introduction

This training program will enable participants to understand the elements of developing a strategy, the importance of having a clear vision, and the need for long-term plans so that goals can be delivered.

The training program provides a step-by-step approach for focusing on the future and the route needed to follow to get there. There is a need to track progress through the use of measurement to demonstrate the organization's progress. The whole approach delivers an aligned organization with every role working together towards the same goal.

The focus is on how to develop strategic business plans and then put them into action. You will discover how to align the organization with the strategy by engaging with stakeholders, communicating effectively internally and externally, measuring progress, and making tactical adjustments along the way. It also explains effective ways of evaluating how well strategic objectives have been achieved, learning lessons, recognizing success, and the contributions of teams and individuals.
