The Project Risk Management Preparation for Risk Management Professional (PMI-RMP)®

Course Introduction

Uncertainty is an inherent part of every project, and the ability to manage risk effectively has become a critical differentiator for successful project delivery. Organizations today require professionals who can systematically identify, analyze, and respond to risks in order to protect project objectives and enhance value creation.

Developed by **BOOST**, the Project Risk Management Preparation for Risk Management Professional (PMI-RMP)® course is designed to prepare experienced project professionals for the PMI-RMP® certification while building strong, practical risk management capability. The course aligns with PMI's risk management framework and focuses on applying structured risk processes across the project lifecycle.

This program goes beyond theoretical concepts by emphasizing professional judgment, decision-making under uncertainty, and real-world risk scenarios. Participants will gain the confidence to manage threats and opportunities proactively while preparing effectively for the PMI-RMP® certification exam.
