## The PMP® - Project Management Professional (with Exam)

### Course Introduction

Project management has become a core capability for organizations seeking predictable delivery, risk control, and strategic alignment. The PMP® certification, issued by the Project Management Institute (PMI®), is globally recognized as a benchmark for professional project management competence, covering both traditional and agile practices.

Developed by **BOOST**, the PMP® - Project Management Professional (with Exam) course is designed to prepare professionals for the PMP® certification exam while building real-world project management capability. The program goes beyond memorization of concepts and focuses on understanding PMI's mindset, applying project management principles across scenarios, and developing the judgment required to select the right approach in complex project environments.

**This course** integrates exam-focused preparation with practical project management thinking, enabling participants to manage scope, schedule, cost, risk, and stakeholders effectively—while confidently approaching the PMP® certification exam.
