PMP

Course Introduction

Project management has become a critical capability for organizations seeking consistent delivery, controlled risk, and strategic alignment. The PMP® (Project Management Professional) certification, issued by the Project Management Institute (PMI®), is globally recognized as the gold standard for professional project management competence.

Developed by **BOOST**, the PMP® - Project Management Professional course is designed to prepare professionals for the PMP® certification exam while building strong, real-world project management capability. The program emphasizes PMI's framework, mindset, and performance domains, covering predictive, agile, and hybrid project environments.

This course goes beyond theory by focusing on professional judgment, scenario-based decision-making, and practical application of project management principles. Participants gain the confidence to manage projects effectively and approach the PMP® exam with clarity, structure, and readiness.
