CompTIA Cloud+ (CV0-003)

Course Introduction

Cloud computing has become a core foundation for modern IT operations, requiring professionals who can design, deploy, manage, and optimize cloud environments across platforms. As organizations adopt hybrid and multi-cloud strategies, there is a growing demand for practitioners who understand cloud architecture, security, performance, and troubleshooting beyond vendor-specific tools.

Developed by **BOOST**, the CompTIA Cloud+ (CV0-003) course is designed to prepare IT professionals for the Cloud+ certification while building practical, vendor-neutral cloud operations capability. The program focuses on real-world cloud concepts including architecture, deployment, networking, security, monitoring, and lifecycle management aligned with the CV0-003 exam objectives.

This course enables participants to confidently support cloud environments, apply best practices for performance and security, and prepare systematically for the CompTIA Cloud+ certification exam—while strengthening hands-on cloud operations knowledge applicable across industries.

Course Outline

✓ Day 03

Cloud Operations, Monitoring, and Optimization

Module 1: Cloud Operations and Management

- ✓ Day-to-day cloud operations and administration
- ✓ Resource management and capacity planning
- ✓ Change and configuration management in cloud environments

Module 2: Monitoring, Performance, and Optimization

- ✓ Monitoring cloud performance and availability
- ✓ Identifying inefficiencies and cost optimization
- ✓ Using metrics and alerts for operational improvement
