ACCA Certificate in Public Financial Management (CertPFM)

Course Introduction

Public sector institutions are under increasing pressure to enhance transparency, accountability, and efficiency in the management of public resources. Strong public financial management (PFM) systems are essential to ensure effective budgeting, sound expenditure control, improved service delivery, and credible financial reporting.

Recognizing the importance of robust financial governance in the public sector, **BOOST** Consulting & Training delivers the **ACCA Certificate in Public Financial Management (CertPFM)** program to equip professionals with a structured understanding of public financial management principles and international good practices. This professional-level course is designed to support candidates preparing for the CertPFM qualification while strengthening practical workplace knowledge.

The program covers key PFM areas such as strategic budgeting, public sector accounting, internal controls, procurement and expenditure management, financial reporting, governance, audit, and performance monitoring. Emphasis is placed on how these elements work together to promote fiscal discipline, efficient resource allocation, and accountability.

Through structured explanations, applied examples, and exam-focused guidance, participants will develop the ability to apply PFM tools and frameworks to support reform initiatives, improve financial oversight, and enhance transparency in public sector institutions.
