Certificate in Advanced Governance, Risk and Compliance (GRC)

Course Introduction

In an era of increasing regulatory requirements, complex operational risks, and heightened stakeholder expectations, organizations must strengthen Governance, Risk, and Compliance (GRC) capabilities to protect value, ensure accountability, and enable sustainable performance. Modern GRC is no longer limited to compliance—it supports strategic alignment, risk-informed decision-making, and proactive control management across the enterprise.

Recognizing the need for integrated oversight and assurance, **BOOST Consulting & Training** has developed the **Certificate in Advanced Governance, Risk and Compliance (GRC)** program to equip professionals with advanced frameworks, tools, and practical methods to build and enhance enterprise-level GRC systems. This program emphasizes the integration of governance structures, enterprise risk management (ERM), regulatory compliance, internal controls, and assurance coordination.

The course focuses on how organizations can design cohesive GRC programs that align policies, risks, controls, and compliance obligations into a unified structure that supports executive oversight and operational effectiveness. Participants will also explore how

technology, reporting dashboards, and performance indicators enhance transparency and decision-making.

Through structured frameworks, real-world case discussions, and applied exercises, participants will gain the skills to design and implement effective GRC programs, strengthen control environments, and support sustainable governance and risk management practices.

Certificate in Advanced Governance, Risk and Compliance (GRC)

Learning Objectives

- ✓ Understand advanced GRC concepts and how governance, risk, and compliance integrate across the organization
- ✓ Develop and strengthen governance structures, accountability models, and policy frameworks
- ✓ Apply enterprise risk management (ERM) methodologies including risk identification, assessment, and risk appetite
- ✓ Build risk and control frameworks and map controls to risks and compliance requirements
- ✓ Implement compliance management systems including regulatory obligations tracking and monitoring
- ✓ Strengthen internal controls and support control testing and remediation processes
- ✓ Coordinate assurance activities across functions to reduce duplication and improve coverage
- ✓ Develop effective GRC reporting dashboards, KRIs/KPIs, and executive-level reporting
- ✓ Support GRC implementation through change management, culture, and continuous improvement

Certificate in Advanced Governance, Risk and Compliance (GRC)

Course Outline

✓ DAY 01

Advanced GRC Frameworks and Governance Structures

- ✓ Evolution and scope of modern GRC
- ✓ Integrating governance, risk, and compliance functions
- ✓ Governance structures, roles, and accountability
- ✓ Policy management and oversight frameworks
- ✓ Aligning GRC with organizational strategy
- ✓ Common GRC maturity challenges

ABU DHABI: +971 2 449 6000
