Certificate in AI Governance

Course Introduction

As Artificial Intelligence becomes embedded across business functions, organizations face increasing governance challenges related to accountability, transparency, ethical use, data privacy, security, regulatory compliance, and operational risk. Without proper governance frameworks, AI systems may expose organizations to reputational damage, legal liabilities, biased decision-making, and control failures.

Recognizing the need for structured oversight of emerging technologies, **BOOST Consulting & Training** has developed the **Certificate in AI Governance** program to equip professionals with a practical and risk-based approach to governing AI across the organization. This advanced-level program explains how to establish AI governance frameworks, policies, roles and responsibilities, risk assessment methodologies, monitoring controls, and assurance processes.

The course focuses on evaluating AI systems throughout their lifecycle—from design and development to deployment and continuous monitoring—ensuring responsible use, compliance, and alignment with organizational values and risk appetite. Participants

will also explore how AI governance integrates with broader Governance, Risk, and Compliance (GRC) structures.

Through structured frameworks, case discussions, and applied exercises, participants will gain the skills to support AI governance initiatives that enable innovation while strengthening control, trust, and accountability.

Certificate in AI Governance

Target Audience

- ✓ Governance, risk, and compliance (GRC) professionals
- ✓ Risk managers and enterprise risk management specialists
- ✓ Internal auditors and IT auditors
- ✓ Compliance and data protection officers
- ✓ Technology governance and information security professionals
- ✓ AI project managers and digital transformation leaders
- ✓ Legal, ethics, and regulatory affairs professionals

Certificate in AI Governance

Learning Objectives

- ✓ Understand the concept, purpose, and key pillars of AI governance
- ✓ Identify governance risks related to AI such as bias, lack of transparency, privacy, and security exposure
- ✓ Establish AI governance structures including oversight committees, ownership models, and escalation paths
- ✓ Develop AI policies, standards, and procedures aligned with risk and compliance requirements
- ✓ Apply AI risk management methods including risk assessment, control mapping, and monitoring indicators
- ✓ Evaluate AI lifecycle controls including data governance, model training, testing, validation, and change management
- ✓ Strengthen AI compliance readiness through documentation, traceability, and audit evidence management
- ✓ Design governance mechanisms for third-party and vendor AI systems
- ✓ Implement AI governance reporting dashboards, KPIs, and assurance practices

Certificate in AI Governance

Course Outline

✓ DAY 01

Introduction to AI Governance and Responsible AI

- ✓ Overview of AI technologies in organizations
- ✓ Why AI governance is essential
- ✓ Principles of responsible and ethical AI
- ✓ Accountability, transparency, and explainability
- ✓ Roles and responsibilities in AI oversight
- ✓ Integrating AI governance into existing governance structures

ABU DHABI: +971 2 449 6000

ABU DHABI: +971 50 412 3294

DUBAI: +971 4 888 6787

KSA: +966 56 416 0617

EGYPT: +20 127 111 1770

Certificate in AI Governance

Course Outline

✓ Day 02

AI Risk Management and Control Frameworks

- ✓ AI-related risk categories (operational, legal, ethical, reputational)
- ✓ Risk identification and assessment for AI systems
- ✓ Mapping controls to AI risks
- ✓ Monitoring AI risks and key risk indicators
- ✓ Aligning AI governance with enterprise GRC frameworks
- ✓ Case examples of AI governance failures and lessons learned

ABU DHABI: +971 2 449 6000

ABU DHABI: +971 50 412 3294

Certificate in AI Governance

Course Outline

✓ Day 03

AI Lifecycle Governance

- ✓ AI system lifecycle stages and governance checkpoints
- ✓ Data governance for AI training and testing
- ✓ Model development, validation, and approval processes
- ✓ Change management and version control for AI models
- ✓ Performance monitoring and model drift management
- ✓ Documentation and traceability requirements

ABU DHABI: +971 2 449 6000

Certificate in AI Governance

Course Outline

✓ Day 04

Compliance, Ethics, Privacy, and Third-Party AI

- ✓ Regulatory and compliance considerations for AI
- ✓ Data privacy and protection in AI systems
- ✓ Managing bias, fairness, and ethical concerns
- ✓ Governance of third-party and vendor AI solutions
- ✓ Contractual controls and outsourcing risks
- ✓ Incident management and response for AI failures

ABU DHABI: +971 2 449 6000

ABU DHABI: +971 50 412 3294

Certificate in AI Governance

Course Outline

✓ Day 05

AI Assurance, Audit Readiness, and Implementation

- ✓ Internal audit and assurance approaches for AI
- ✓ Evidence collection and documentation for AI governance
- ✓ AI governance dashboards and reporting structures
- ✓ KPIs and KRIs for AI oversight
- ✓ Implementing AI governance frameworks across the organization
- ✓ Change management and building AI governance culture

ABU DHABI: +971 2 449 6000
