Certified Enterprise Risk Specialist (CERS)

Course Introduction

Ignoring high-consequence, low-likelihood risks can be damaging to an organization, but preparing for everything is impossibly costly. In the current business environment, as well as the inevitable implications that COVID-19 has brought, risks have come in various forms and have led to industry disruptions. Enterprise risk management enables an organization to identify and assess these challenges and prepare solutions for how to resolve them.

This training course is designed to provide participants with the essential concepts related to Enterprise Risk Management. This course will explore the methods for designing and implementing an effective risk management program and processes, how to enhance the performance of the organization, and create strategic solutions to identified risks.
