Value Engineering and Cost Planning

Course Introduction

This comprehensive training course consists of two modules:

Module 1 - Project Scheduling & Cost Planning Skills Project scheduling is a mechanism to communicate what tasks need to get done and which organizational resources will be allocated to complete those tasks in what time frame. A project schedule is a document that collects all the work needed to deliver the project on time.

Module 2 - Value Engineering Skills: Improving Performance & Profitability. This course focuses on how to deliver reliable estimates that can result in significant savings later in the project life. To develop reliable cost and schedule estimates is one of the critical management skills and is addressed in this course.
