Reserves management, monitoring and evaluation

Course Introduction

This training program aims to enhance the capacities of participants in managing nature reserves and protecting biodiversity. Participants will acquire the skills needed to develop effective plans and programs, follow up on their implementation, and evaluate them. The program targets reserve managers, government employees, researchers, and investors in the field of the environment.

Reserves management, monitoring and evaluation

Learning Objectives

- ✓ Preparing participants to develop plans and programs to protect protected areas and follow up on their implementation and evaluation procedures.
- ✓ Raising the capacities of participants in the management and protection of biodiversity.
- ✓ Prepare and develop plans and programs for the protection of nature reserves.
- ✓ Recognize the basic principles of evaluating the effectiveness of management for reserves and their applications.
- ✓ Training on how to manage nature reserves and monitor biodiversity.
- ✓ Provide basic information for managers at all levels.
- ✓ Provide participants with basic information on utilizing available resources and making effective decisions.
- ✓ Improve communication and collaboration between reserve managers and investors.
- ✓ How to use management effectiveness assessments to adapt and improve reserve management.
- ✓ Developing work methods and procedures and keeping abreast of technical developments.
- ✓ Methods of preparing databases, documents, and specialized reports on protected areas

Reserves management, monitoring and evaluation

Course Outline

✓ Day 03

Meta-evaluation and methods:

- ✓ Meta-evaluation of sanctuary management effectiveness (METT):
- ✓ The concept and importance of meta-evaluation.

METT-4 (METT-4):

- ✓ Steps and procedures.

Ways to conserve and manage the reserve's natural resources:

- ✓ Effective strategies and case studies.
