Handling Medical Waste Training Course

Course Introduction

Medical Wastes

Medical wastes are hazardous and should be properly disposed of to protect the environment and also healthy people who can be infected when get into contact with highly infectious medical wastes.

Hospitals and healthcare centres face huge challenges in safely removing medical waste and disposing of the same while following the prescribed standard procedures.

This course is made for those who deal with hospital wastes such as used syringes, bio-chemical items, and other potentially hazardous things, and educates them about their safe handling to prevent accidents and protect the environment.

Handling Medical Waste Training Course

Course Outline

✓ DAY 01

Introduction to Handling Medical Waste

- ✓ Key Terms
- ✓ Handling Medical Waste - Overview
- ✓ Handling Medical Waste - History and Background
- ✓ Handling Medical Waste - Generators
- ✓ Statistics for Handling Medical Waste in the Healthcare Industry
- ✓ Responsibilities
- ✓ Applicable Regulations for Handling Medical Waste

Medical Waste Hazards

- ✓ Health Risks Associated with Handling Medical Waste
- ✓ Microorganisms
- ✓ Radioactive Waste
- ✓ Needlestick Injuries
- ✓ Poisoning and Pollution

Handling Medical Waste Training Course

Course Outline

✓ Day 02

Managing Medical Waste

- ✓ Disposal
- ✓ Transporting
- ✓ Storage
- ✓ Treatment
- ✓ Incineration
- ✓ Thermal Treatment
- ✓ Chemical Treatment
- ✓ Universal Precautions and Work Practice Controls
- ✓ General Clean-Up Guidelines
- ✓ Decontamination
