Digital Transformation in the Financial Industry

Course Introduction

In order to achieve market leadership, financial services industry (FSI) firms continue to focus on becoming holistically digital, customer-facing enterprises. The financial industry sees digital transformation as a priority in investment, as more financial institutions are gearing towards major digital transformation in the coming years.

Digital transformation

The emergence of FinTech companies and solutions over the years has led to a completely new and transformed financial services landscape. A new era of open banking has enabled systems to quickly and seamlessly integrate with new platforms and applications. Physical banks and paper systems are quickly being replaced by robust networked digital ecosystems.

This training course is designed to provide participants with relevant concepts about digital transformation, its impact on the financial industry, and the current technology adaptation to the financial industry.
