Leading Digital Transformation and Innovation

Course Introduction

The emergence of novel and powerful digital technologies, digital platforms, and digital infrastructures has significantly altered innovation and entrepreneurship. Digital technologies have broader implications for value creation and value capture than simply providing new opportunities for innovators and entrepreneurs. In the last decade, management and organizational scholars have paid increasing attention to the interconnections between digital transformation and innovation management.

This training course is designed to be interactive and participatory, to enable the participants to understand the digital disruption drivers, which will help them to examine the digital competencies of their organizations and teams, thereby improving innovation capabilities to enable a digitally ready organization.
