Data Mining and Business Intelligence

Course Introduction

Companies, businesses, and organizations all have established goals and results they want to reach. Gathering and analyzing data is essential to monitor the performance and determine the actions needed to reach the fullest result. Today, most of the companies across the world are spending millions to master the technique of collecting, comprehending, analyzing, and monetizing data through business intelligence. Business intelligence (BI) combines business analytics, data mining, data visualization, data tools and infrastructure, and best practices to help organizations to make more data-driven decisions.

This course is designed to provide participants with the relevant knowledge of the forms and architecture of business intelligence. The course introduces data mining, as it is used to support business intelligence through analyzing vast amounts of data to produce information and recommendations.

Data Mining and Business Intelligence

Course Outline

✓ Day 02

Working with Data

- ✓ Defining Data Mining
- ✓ Data Mining Techniques
- ✓ Data Warehousing
- ✓ Data Mining Tools, Methods, and Techniques
- ✓ Cleaning and Transforming Data
- ✓ Shaping and combining data
- ✓ Enhancing the data model
- ✓ Custom graphics and charts, and maps

ABU DHABI: +971 2 449 6000

Data Mining and Business Intelligence

Course Outline

✓ Day 03

Data Analysis

- ✓ Data Analysis Expression (DAX)
- ✓ Factor Analysis
- ✓ Analyzing data through Power Pivot
- ✓ Analyzing data with Power View and Power Map
- ✓ Cluster Analysis and Multidimensional Scaling
