Procurement and Supply Chain Operations Management

Course Introduction

As the global economy moved into the 21st Century, supply chain, procurement, and logistics are becoming a critical influence in the product movement in meeting and exceeding client demands. Organizations deem it essential to lower costs and increase productivity by managing the supply chain and logistics to boost performance. Understanding the supply chain and logistics field requires strategic planning and a great focus on procurement and purchase of materials to ensure swift delivery to clients.

This training course is designed to provide participants with relevant concepts and strategies that supply chain professionals might consider in order to dynamically manage the supply chain, procurement, and logistics unit or business.
