Leading the Future

Course Introduction

Leadership is most commonly associated with motivating staff and streamlining organizational effectiveness. While this is core, leadership implies far more. It implies foresight and vision. Leaders are not just those who are responsible for an organization's "best manifestation today." Whether they like it or not, they also carry the burden of responsibility for their organization's best manifestation tomorrow.

This training course is designed to provide participants with the relevant concepts on how they can lead their organisation's future and familiarize themselves with future trends and the 4th industrial revolution.

Leading the Future

Target Audience

This course is designed for high-level leaders, including senior executives, directors, and business strategists. It is ideal for those responsible for shaping the strategic direction of their organizations, particularly individuals seeking to enhance their leadership capabilities and understand how future trends will impact their roles. Whether you are a C-suite executive, department head, or senior manager, this course will equip you with the knowledge to lead your organization into the future.
