Digital Transformation in Supply Chain Management

Course Introduction

Regardless of whether you are a goods- or service-based company, effectively using digital technologies across your supply chain is critical in today's technology-driven environment. Digital transformation is heralding the next era in supply chain management, in which suppliers and customers come together in entirely new ways, blurring the lines between the digital and physical worlds and erasing traditional organizational boundaries.

This course covers digital transformation elements that you can apply across all phases of your supply chain for operational success.
