## Applied Asset Management and ISO 55000

### Course Introduction

#### Applied Asset Management

This course offers participants a comprehensive understanding of ISO 55000 Asset Management principles, methods, common terminology, and international standards. Rather than being an academic study, it emphasizes practical application, focusing on how to implement ISO 55000 principles effectively in the workplace.

Participants will be equipped to apply asset management principles within their own areas of responsibility, regardless of whether their organization has an established asset management process or is starting from scratch. By applying these key principles, participants can enhance the effectiveness of their asset portfolio.

Featuring high-quality visuals and interactive content, the course fosters engagement between the facilitator and participants to ensure their needs are met. Relevant case studies are used to highlight key concepts, and hands-on exercises allow participants to apply their learning and gain insights into best practices.

#### Training Course Methodology

This course is designed to be interactive and participatory, and includes various learning tools to enable the participants to function effectively and efficiently. The course will use sessions, exercises, and case applications, and a presentation about proven-by-practice methods, new insights, and ideas about emotional intelligence and its effects in the corporate world.
