Asset Performance Management Best Practices

Course Introduction

This **five-day** course provides a comprehensive exploration of best practices in Asset Performance Management (APM). Participants will learn the importance of APM and its impact on organizational success, delve into data management and analytics, and develop maintenance strategies to enhance asset reliability. The course also covers risk management techniques and the integration of APM into organizational strategy. Through a mix of theoretical insights, practical applications, and real-world case studies, attendees will be equipped with the knowledge and tools to implement effective APM practices within their organizations.

Asset Performance Management Best Practices

Course Outline

✓ **03 DAY THREE**

Maintenance Strategies and Reliability

- ✓ Preventive vs. predictive maintenance
- ✓ Reliability-centered maintenance (RCM)
- ✓ Condition-based maintenance (CBM)
- ✓ Developing maintenance schedules
- ✓ Asset reliability and availability metrics
- ✓ Root cause analysis for asset failures

ABU DHABI: +971 2 449 6000
