Maintenance Management and Cost Optimization

Course Introduction

This course is designed to provide maintenance planners, maintenance and reliability engineering, maintenance programmers, and maintenance managers with the skills and knowledge to enable and facilitate the development of an advanced and integrated maintenance cost control management system. Maintenance Cost Control introduces delegates to concepts and techniques that can help lift the maintenance performance and the contribution of maintenance to business performance to a higher level. Provides essential knowledge and skills to achieve optimal performance of equipment, structures, and systems, and improve maintenance procedures to gain maximum return on investment. Maintenance managers will master the methods for increasing asset utilization rates, decreasing costs and downtimes, and ensuring high safety and quality standards.
