HCIA Cloud Computing

Course Introduction

This HCIA-Cloud Computing V4.0 training course is designed to provide participants with a realm of cloud computing. This course places a crucial emphasis on virtualization—an integral technology in the cloud computing landscape. Delving into essential aspects of computing, networking, and storage pertaining to virtualization, the curriculum aims to equip participants with comprehensive insights.

By unraveling the distinctive features of virtualization, this course ensures a swift and accessible comprehension of the expansive field of cloud computing. Get ready to navigate the foundational principles that underpin cloud technologies and discover the key role virtualization plays in shaping the future of computing.

Training Course Methodology

This training course is designed to be interactive and participatory, and includes various learning tools to enable the participants to operate effectively and efficiently in a multifunctional environment. The course will use lectures and presentations, and group discussions.

HCIA Cloud Computing

Course Outline

✓ Day 01

Brief Introduction to Cloud Computing

- ✓ Cloud Computing is already here
- ✓ Cloud Computing Definition
- ✓ Origin and Development of Cloud Computing
- ✓ Cloud Computing Models

Introduction to Compute Virtualization

- ✓ What's a Virtual Machine (VM)
- ✓ Important Concepts in Compute Virtualization
- ✓ Computing the virtualization implementation process
- ✓ Cloud Computing and Virtualization
- ✓ Introduction to KVM
- ✓ Introduction to FusionCompute
