Business Continuity Management Standards, Plans, and Practices

Course Introduction

In an ever-changing global and economic landscape, organizations must be prepared to handle disruptions effectively. Developing and implementing a robust Business Continuity Management System (BCMS) allows organizations to anticipate challenges, maintain operations, and minimize risks.

This course equips participants with the knowledge, tools, and methodologies needed to design, implement, and manage effective business continuity plans. With practical applications and insights, participants will be ready to address real-world challenges and support organizational sustainability.

Course Methodology

The course combines:

- ✓ Expert-led presentations
- ✓ Hands-on exercises and case studies
- ✓ Group discussions and problem-solving activities

Participants will work through each stage of business continuity planning, from risk assessment to plan validation, supported by real-world examples and industry best practices.
