ISO 22000 Food Safety Management System

Course Introduction

ISO 22000 Standard defines the requisites relating to food safety management systems in every food chain, right from the producers of feed, the basic industry producers, to the food producers, retailers, carriers, and catering establishments. The standard comprises terms relating to the program of essential prerequisites and the operating programs. In this course, various aspects of food safety management systems will be discussed with real-life examples for better understanding.
