ISO 28000 Lead Implementer

Course Introduction

The ISO 28000 standard provides a framework for establishing, implementing, maintaining, and improving a Security Management System (SeMS) within the supply chain.

This **5-day** course, offered by **BOOST**, is designed to equip professionals with the knowledge and skills to lead the implementation of an ISO 28000-compliant SeMS. Participants will learn how to identify security risks, develop effective security management strategies, and ensure compliance with ISO 28000 requirements. Through a combination of theoretical insights and practical applications, this course prepares professionals to lead security management initiatives that enhance supply chain resilience.
